CONSTRUCTION ACTIVITY IN HANOI, NORTH VIETNAM

1. A study was made of the Hanoi area in order to determine the type of construction being carried on at 3 different locations and to confirm or deny the existence of radar masts along the bank of the Song Hong just NE of the city.

2. The study of the four areas revealed the following information:

a. The group of buildings at 21 02 28N-105 48 15E are still under construction and do not appear to be military. They are probably of masonry construction and consist of 8 multistory apartment type buildings, 2 administration buildings, one U-shaped building and 11 miscellaneous buildings. Six temporary construction sheds and buildings are also located in the area.

25X1D

b. On [REDACTED] the large building under construction at 21 01 24N-105 49 30E was less than one third under roof. The remainder of the building consists of erected vertical supports and several roof support beams in place. Very little progress was made from [REDACTED] except for the addition of a few roof beams.

25X1D

c. No new construction or cranes were observed in the reported area of 21 02N-105 49E.

d. No radar masts were observed at or in the vicinity of the reported site (21 03N-105 52E)
